

Circular Life

Circular Life is a startup focusing on circular economy. This vision for a circular economy is based on three principles:

Design out
waste and
pollution

Keep products
and materials
in use

Regenerate
natural systems

Company's executives and employees

How things “worked” so far

TAKE

MAKE

WASTE

It doesn't work. Things must change!

Our first project

Since the corona outbreak, it has become very difficult to identify those who are affected by the virus or not. To solve this issue, temperature devices are often used to measure body temperature. These devices have non-contact IR temperature sensors which can measure the body temperature without any physical contact.

But hopefully, the corona outbreak will eventually end. **And then what happens to all these devices???**

Say NO to ownership, say YES to renting!!!

- Our clients will not buy our devices.
- They will rent them.
- Use them for as long as they like.
- Sent the devices back to us.
- We disassemble them.
- Use the parts to create our new project.

Benefits for everyone

- Less costs for our company.
- The clients pays only for the time using our device.

- No waste for the environment.

circular life

LIFE, AS IT MEANT TO BE
